

ABOUT ExSIDE

>> WHAT IT IS

ExSIDE is a European joint doctoral training program organized by a consortium of 8 European universities and 9 non-academic partners. By promoting an interdisciplinary research agenda combining different scientific approaches, ExSIDE aims at improving our understanding of the role of expectation formation and social influence for economic dynamics and for the optimal design of economic policy. ExSIDE, as European Joint Doctorate (EJD), is an integrative part of Marie Skłodowska-Curie Actions (MSCA) in Horizon 2020.

>> WHAT WE DO

The ExSIDE research agenda is put forth by 15 doctoral fellows working on fifteen individual research projects. The individual research projects have different research objectives and rely on different methodological approaches, ranging from behavioural economics to network analysis, from agent-based models to laboratory experiments. The ExSIDE project contributes to four broad research areas: Role of Expectations and Social Influence for Economic Dynamics; Policy design under Consideration of Expectations; Behavioural and Psychological Foundations of Expectation Formation; Social Influence and Opinion Dynamics.

>> WHERE WE ARE

The list of academic institutions and local coordinators is the following:

- Bielefeld University;
- Università Ca' Foscari, Venezia;
- Università del Sacro Cuore, Milano;
- Université Catholique de Louvain;
- Université Paris 1 Panthéon-Sorbonne;
- Universiteit van Amsterdam;
- University College of London;
- University of Surrey;

Università
Ca' Foscari

International ExSIDE >> Doctoral Workshop

THIS WORKSHOP IS SPONSORED BY EXSIDE,
WHICH HAS RECEIVED FUNDING FROM THE
EUROPEAN UNION'S HORIZON 2020 RESEARCH
AND INNOVATION PROGRAMME UNDER THE
MARIE SKŁODOWSKA-CURIE GRANT
AGREEMENT NO 721846.

April 2-3, 2020
University of Surrey, UK

>> PROGRAM

The ExSIDE Doctoral Workshop is organized by doctoral fellows with the aim to provide PhD candidates at any stage of their doctoral studies with an opportunity to present their research projects.

Taking place at University of Surrey (UK), the workshop is designed to create an informal atmosphere in which participants can discuss their work in progress with peers and researchers, exchange ideas about recent developments in their fields, and expand their research network.

The workshop will be dedicated to the presentation of papers from the participants. Each presentation will be discussed by one of the ExSIDE doctoral fellows. The workshop will include about 8 presentations per day, each lasting 25 minutes.

Two lectures from world-renowned keynote speakers will also take place.

>> PRESENTATION

We particularly welcome papers from the following research areas:

- Agent Based Models
- Behavioural Economics
- Climate Economics
- DSGE Models
- Expectation and Perception Measures
- Finance and Regulation
- Game Theory
- Heterogeneous Agent Models
- Industrial Organization
- International Economics
- Network Theory
- Opinion Formation and Diffusion
- Social Influence and Dynamics

>> KEYNOTE SPEAKERS

It is our pleasure to warmly welcome two distinguished scholars who have accepted to be our keynote speakers at the ExSIDE Doctoral Workshop. Their expertise encompasses, among other topics, heterogeneous expectations and learning in macroeconomics, and game-theoretic approaches to organizations and networks. We aim to congregate renowned scholars and students here to offer all participants an opportunity to meet both distinguished economists, discuss and exchange ideas about the most recent advancements in their fields.

George Evans (University of Oregon)

Prof. Evans obtained his PhD from the University of California, Berkeley and currently holds a Chair of Economics at the University of Oregon. The spectrum of his research ranges from studying how learning under heterogeneous expectation reaches stability, to the convergence of adaptive learning in macroeconomics. His research has significantly contributed to the advancement of macroeconomics and economic policy analysis. Furthermore, his papers have been published in top journals such as the American Economic Review, Econometrica, Journal of Monetary Economics, The Review of Economic Studies, among others.

Andrea Galeotti (London Business School)

Prof. Galeotti received his PhD from Tinbergen Institute - Erasmus University Rotterdam and holds a professorship at the London Business School since 2018. His research covers a broad domain of topics regarding network formation processes, game-theoretic approaches to microeconomics and industrial organization. Prof. Galeotti's work has been published in top journals, including the American Economic Review, The Review of Economics Studies and the European Economic Review.

>> ACCOMODATION AND VENUE

The accommodation in a hotel will be provided to selected candidates covering up to three nights of their planned stay. There is no participation fee. All speakers are invited for social dinner. The workshop will take place in Stag Hill, the main campus of University of Surrey, UK.

>> APPLICATIONS

Please submit a full paper or an extended abstract at: applications.workshop@exside-itn.eu by indicating "ExSIDE Workshop - submission" in the subject line. Please provide the following information in the email: name and surname; email address; name of affiliated university; keywords describing the topic and methodology of your paper. For more details please consult our website.

>> SUBMISSION DEADLINE

December 20th, 2019
